Patient Name: Michael Johnson

DOB: March 22, 1985

MRN: 001234567

Date of Exam: October 11, 2023

Procedure: MRI of the Right Knee without Contrast

Findings:

- Menisci: There is a vertical tear in the posterior horn of the medial meniscus.
- Ligaments: ACL, PCL, MCL, and LCL are intact.
- Bones: No fractures or bone marrow edema observed.
- Cartilage: Mild cartilage thinning in the medial compartment.
- Joint Effusion: Small to moderate effusion present.
- Soft Tissues: No abnormalities detected.

Impression:

- Medial Meniscal Tear: Vertical tear in the posterior horn of the medial meniscus.
- Joint Effusion: Consistent with intra-articular inflammation.

Recommendations:

- Correlate clinically and consider orthopedic consultation for possible arthroscopic intervention.

Radiologist:

Dr. Steven Kim, MD

Radiology Department
